

DNS

The full version of OnApp Cloud (with CDN enabled) now gives you access to our free Anycast DNS service. Instead of managing your own DNS servers you can use our fully redundant global DNS, hosted at multiple datacenters around the world, and manage it through your OnApp Control Panel. You can use our DNS service with domains registered anywhere on a third party domain registrar. The Control Panel lets you set up hostnames, manage DNS records, aliases, Mail Exchange, TXT and SRV records. Using DNS has two main steps: [setting up DNS hostnames](#) , and [managing DNS zones](#).
