

Virtual Server Disk IOPS Statistics

The system tracks IOPS (Input/Output Operations per Second) for virtual servers and generates charts that help analyze VS disk performance. To see IOPS for a virtual server:

1. Go to your Control Panel's **Virtual Servers** menu.
2. Click the label of the virtual server you're interested in.
3. Click the **Storage -> Disks** tab.
4. Click the **Actions** button next to the required disk, and then choose **IOPS**.

5. There are four charts on the screen that appears:

- IOPS for the last hour
- IOPS for the last 24 hours
- Data written/read for the last 24 hours
- Data written/read for the last hour

6. To zoom into a time period, click and drag in a chart. Click the **Reset Zoom** button to zoom out again.

7. You can filter the statistics by date and time - select the time period from the drop-down menu and click the **Apply** button.

The OnApp API allows you to limit the Hourly IOPS and Hourly data by setting the limit=N parameter, where the N variable is the number of hours for which the charts will display the info.
