

Create Backups for All Disks

The following request applies to configuration where normal backups are enabled for cloud, and will create backups for all disks.

To create backups/snapshots of all VS disks:

```
POST /virtual_machines/:vm_id/backups.xml
POST /virtual_machines/:vm_id/backups.json
```

XML Request example

```
curl -i -X POST -H 'Accept: application/xml' -H 'Content-type: application/xml' -u user:userpass --url
http://onapp.test/virtual_machines/irs1j5c1017pw2/backups.xml
```

JSON Request example

```
curl -i -X POST -H 'Accept: application/json' -H 'Content-type: application/json' -u user:userpass --url
http://onapp.test/virtual_machines/irs1j5c1017pw2/backups.json
```

Where you have set the ID of a virtual server.
