

Technical Details

The sections in this chapter will list all the technical requirements as well as architecture diagrams that you should consider before creating a cloud in OnApp:

- [Suggested Specifications](#) - the list of hardware requirements for the different components of the cloud
- [Server Config Reminder](#) - the description of supported and recommended server configurations
- [Software Requirements](#) - the software requirements for Control Panel, Static Compute Resources and Static Backup Servers
- [Recommended Network Configurations](#) - the diagrams describing the the recommended network configurations for an OnApp cloud installation
- [Types of Cloud Service with OnApp](#) - the description of the kinds of cloud services you can implement using OnApp
- [Supported Functionality](#) - the list of supported features depending on the type of the cloud
