

ISOs

OnApp allows uploading custom bootable ISOs for recovery purposes. These could be different images for Windows/Linux/FreeBSD or any additional software.

Currently, user can only view public ISOs.

To view the ISOs available to you:

1. Go to **Control Panel** and click **Templates**.
2. Select **ISO list** from the menu that expands.
3. The page that loads, will show the list of ISOs available to you separated into three tabs:
 - **All ISOs** - the list of all ISOs available on your system
 - **System ISOs** - the list of the ISOs that are publicly available to all users

For each ISO listed, you see the following details displayed:

- *log status* - the status of the last log item of the ISO (complete/pending/failed). Click the status to view the log details for the ISO (available to the ISOs that were uploaded through an URL).
- *OS* - the icon that indicates the operating system of the ISO
- *Label* - the name of the ISO
- *Min memory size* - the minimum RAM size required for the ISO
- *Operating systems* - the operating system on the ISO
- *Virtualization* - the virtualization type chosen for the ISO
